

OBJECT OF THE MONTH

EDUCATION CENTRE, STRASSBURG

The new Straßburg Education Centre is a pioneering educational facility for around 300 children. Open-plan learning environments, modern classrooms and spacious common areas place high demands on comfort, energy efficiency and indoor air quality.

PICHLER supplied several centralised ventilation units (VERSO-CF-1300, VERSO-CF-2300 and VERSO-RHP-30) as well as the complete ventilation peripherals - from silencers and air outlets to spiro ducting, fire dampers and deflector bonnets.

EFFICIENT, QUIET AND NEEDS-BASED

The PICHLER ventilation units used ensure:

- A continuous supply of fresh air in all areas of use
- High energy efficiency thanks to modern heat recovery
- Quiet operation - particularly important in classrooms and study rooms
- Needs-based air volumes for changing occupancies

This not only increases comfort for pupils and teaching staff, but also ensures sustainable and economical operation.

DATA & FACTS

Location: Straßburg im Gurktal

Completion: 2025

Type of building: Educational institution

Architect: AD Architekten ZT GmbH

Planner: Ingenieurbüro Bleiberschnig GmbH

Building technology: Egger Installationen GmbH & Co KG
Kuban GmbH

Products: 5 pcs. Ventilation units, silencers, outlets, spiro ducts, fire dampers, deflector bonnets

Product groups:
